

GO WITH CARE.  
GO WITH GOMEDICS!

## PRESS RELEASE

### NON-URGENT TRANSPORTATION SERVICES LUNCHES IN DURHAM REGION AND THE GREATER TORONTO AREA.

**Toronto, Ontario, April 2, 2019** – Gomedics Health launches Non-urgent Transportation Service in Durham Region and the Greater Toronto Area. The organization provides medically supervised transportation, including patient transfer services to seniors, older adults; people with chronic, cognitive and mental health impairments to and from their healthcare providers.

More than just a driving service, Gomedics prides itself on trusted healthcare professionals who medically chaperone frail and vulnerable clients with complex needs. Healthcare focused, the service transports people with disabilities, cardiac, and complex conditions; including cancer care therapies, schizophrenia, dementia, dialysis, and clients who require ongoing medical care.

Whether it's a routine physician's appointment, rehab, hospital visit or discharge; our goal is to ensure that organizations, clients, caregivers, and their families are supported with safe and reliable transportation.

Dubbed "Uber-Health", Gomedics offers a lot more. The ability to have clients transported by healthcare professionals is incredibly beneficial. According to Dwight Townsend, Principal Director, "having reliable transportation is often the first step in determining whether a patient will actually attend their medical appointments. To attend an important, and sometimes critical appointment means a faster recovery and an overall win for the patient's entire care team.

In addition to improving access to healthcare providers and services, the hallmark of the service is to ensure that clients show-up to their medical appointments and support a meaningful engagement between clients and their healthcare providers.

We look forward to what the service will mean to people across the Province and the tremendous value it adds to the patient experience. Gomedics invites healthcare and social service organizations to partner to better support patients and clients across Durham and Peel Regions, the Greater Toronto (GTA) and Hamilton Area (GHATA).
